Enterprise Clinical Documentation Solutions

DocQment Enterprise Platform®

Challenged with increasing documentation requirements, more stringent compliance requirements and lower reimbursements, health-care providers are pressed to find solutions that extend beyond transcription. Without disruption to your personnel or budget, DocQment Enterprise Platform® with integrated speech recognition:

- Optimizes clinical information workflow,
- Speeds up the revenue cycle,
- Helps achieve HIPAA and regulatory compliance, and
- Helps meet Meaningful Use and EHR requirements.

Award-winning technology developed and proven by MedQuist: the leader in technology-enabled clinical documentation workflow and the #1 user of medical speech recognition.

INTEGRATED SPEECH RECOGNITION

For the CEO and CFO

- Speeds up the revenue cycle
- Improves physician satisfaction
- Increases patient satisfaction
- Reduces documentation costs
- Results in a quick R.O.I.
- Offers pay as you go pricing

REDUCES DOCUMENTATION COSTS

For the HIM Director

- Web-based for easy access from any location
- Produces higher quality reports
- Supports HIPAA and HITECH compliance
- Reduces transcription costs through technology efficiencies
- Automates QA workflow
- Automates core measures reporting

WORKFLOW MANAGEMENT TOOLS

Complete Functionality to Capture, Manage, Analyze and Distribute information safely and securely

Dictation is captured through DocQvoice™, a Web-based, enterprise digital voice capture and transport solution deployed at the customer's location, and seamlessly routed to the right transcriptionist and right department via sophisticated document routing and management functions within the DocQment Enterprise Platform®. The powerful speech recognition engine quickly converts audio files to text, links them, and then automatically routes them to the right editor. Providers electronically sign the completed documents, which are automatically distributed (or uploaded into your HIS system). Final documents are sent in HL7 or CDA structured data format and can be sent directly to MedQuist's CodeRunner™ CAC for automated coding, mined for quality measures reporting, or uploaded into your EHR.

EHR-Integrated Dictation

Through DocQment Enterprise Platform®, providers can dictate directly into the EHR system, creating a comprehensive clinical document note that incorporates both voice and structured text through a single application. Enjoy the ease and speed of a structured template, with the flexibility that only dictation can provide.

FEATURES

- Secure, flexible, high-quality voice capture
- Dictate directly into the EHR
- Global view of in-house and outsourced jobs
- ADT matching for more accurate patient data collection
- Integrated speech recognition
- Automated formatting
- State-of-the-art workflow management tools
- Point-to-Point audit trails
- Electronic signature with attending workflow for Teaching Facilities
- Comprehensive performance analytics and reporting
- Direct routing to CodeRunner™ CAC for automated coding
- Structured data output for reporting and EHR fulfillment

For the CIO

- Easily integrates with EHRs and existing systems
- Scales to the needs of your organization
- Requires few of your technical resources
- Built-in encryption and redundancies
- Generates structured data
- Powerful security features and audit trails

ELECTRONIC SIGNATURE

STRUCTURED DATA OUTPUT

IMPROVES PHYSICIAN SATISFACTION

For the Physician

- Gives full range of voice input options
- Maintains preferred narrative documentation
- Faster report turnaround
- Enables direct dictation into the EHR

WEB-BASED

DICTATE DIRECTLY INTO THE EHR

Experience Adds Up

MedQuist understands how to deploy speech recognition for clinical documentation better than anyone. With more than 1,800 successful implementations, our customers see over 90 percent of their work go through speech recognition, and only MedQuist offers the technology and experience to help you attain the highest levels of efficiency, accuracy, and cost savings.

Reap the Enterprise-Wide Benefits of a Complete Document Workflow Solution

- Increases productivity and quality significantly
- High tech without the high investment
- Proven in more than 1,800 implementations
- Generates CDA-structured data and integrates with EHR systems

Bottom line: MedQuist Technology + Service = Lower costs, better care.

“The DocQment Enterprise Platform has really helped to elevate our HIM department in the eyes of our physicians and business managers,” said Rollins. “While managing transcription can be a daunting task—especially with our volume—we now have the processes in place to not only increase our productivity, but also lower the overall costs.”

Pam Rollins
HIM Manager
Shands HealthCare
