## **Mississippi Radiological Group Selects MedQuist for Speech Recognition Solution**

*Mount Laurel, NJ, August 9, 2007* — MedQuist Inc. (Pink Sheets: MEDQ.PK) announces that Radiological Group PA of Jackson, Mississippi, has selected SpeechQ for Radiology™ as its front-end automated speech recognition (ASR) solution. Radiological Group PA includes 12 radiologists who serve two imaging centers that they own; one imaging center owned by another medical group; and Baptist Medical Center, a 611-bed hospital in Jackson – as well as interpreting numerous other images sent to them by ambulatory clinics and physician offices in the area.

With plans to expand into new markets and imaging centers, Radiological Group PA needed to replace an aging dictation and transcription system that was not able to support multiple entities. They also sought integration with their Web-based PACS in order to streamline workflow. It is common in these environments for a radiologist located at one imaging center to interpret exams from another. With SpeechQ, they will have an ASR solution that can also be easily accessed from any of the locations they serve.

Dr. Houston Hardin, partner and practicing radiologist, Radiological Group PA, commented, “While we considered several vendors for this project, MedQuist was the only company that was not just willing, but insistent that we meet with a system engineer on-site before we agreed to a scope of work and executed an agreement. As a result, we are confident that MedQuist understands our needs and will implement the solution we envision. MedQuist also provided an easy-to-understand and flexible licensing structure that will allow us to easily expand.”

He added that the radiologists plan to self-edit most reports, but will send more complex cases to two in-house medical editors. Radiological Group PA will also make use of SpeechQ’s built-in macros and structured report templates to ensure their reports are concise and accurate.

According to Chris Spring, MedQuist senior product manager for Speech Recognition Solutions, “SpeechQ for Radiology is ideally suited for a radiology practice such as Radiological Group PA that has multiple practice locations. SpeechQ was designed to meet the increased complexity and integrate into the workflow of the contemporary radiology practice serving multiple facilities.”

*MedQuist is a leading provider of clinical documentation workflow solutions in support of the electronic health record. MedQuist provides electronic medical transcription, and health information and document management products and services, including digital dictation, speech recognition, Web-based transcription, electronic signature, medical coding, mobile dictation devices, and outsourcing services.*

*"Safe Harbor" Statement under the U.S. Private Securities Litigation Reform Act of 1995: Statements in this press release regarding MedQuist's business which are not historical facts are "forward-looking statements" that involve risks and uncertainties, including without limitation the risk that SpeechQ for Radiology does not perform as designed. Actual outcomes and results may differ materially from what is expressed or forecasted in forward-looking statements. As a result, forward-looking statements speak only as of the date they were made, and the Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.*
